***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-41, drawn to an apparatus comprises a work area, an uncaging light source that directs uncaging light at the work area and an optical meter that monitors the uncaging light, the optical meter positioned in a first plane that runs through the work area.

Group II, claim(s) 42-76 and 122-137, drawn to an apparatus in which the optical power density greater than  $100 \text{ uW/cm}^2$ , a multiwell plate, and a plate holder configured to accept the multiwell plate which comprises a photoactivatable caged component.

Group III, claim(s) 77-114, drawn to an apparatus in which the optical power density of the uncaging light is substantially uniform over the entire work area and an exposure controller that controls optical energy density of the uncaging light to which the work area portion is exposed whereby the work area is exposed to a desired energy density selected by a user of the device.

Group IV, claim(s) 115-121, drawn to a masked multiwell plate comprises a multiwell plate and a mask, which mask alters optical power density of uncaging light impinging on at least a first portion of the multiwell plate.

Art Unit: 2877

2. The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The claims of these four groups are directed to different inventions which are not so linked to form a single general inventive concept. The inventions are not linked in operation and perform completely different operations as mentioned in details above.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 2877

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa Q. Pham whose telephone number is (571) 272-2426. The examiner can normally be reached on 7:30AM to 6 PM, Monday through Thursday.
